# Set New Mobilization Rules For Students

### Pre-Meds And Pre-Dents Not on Preferred Lists; No Reference to Women; '44 Grads Not Affected

To Press for Maintenance of Enrollment Quota of Medical and **Dental Faculties** 

At the Universities Conference of August 30, 1943, the Director of National Selective Service stated that the manpower situation was such as to require some further cutting down of the number of students in attendance at Canadian universities. In view of the near approach of university registration dates, it was agreed that it was too late to change the regulations for the current year. It was, however, agreed that all universities should observe strictly the existing regulation to the effect that only students who demonstrated by passing their examinations that they were making effective use of their time should be per-mitted to continue university studies. It was further agreed to recommend to the Minister of Labour that he establish a National Advisory Board, with university representation, to advise him with respect to university matters, and particularly with respect to the courses which were considered essential to

the war effort at any given time.

The Minister duly established this Board under the chairmanship of the Director of National Selective Service (Mr. A. MacNamara), with the President of the Universities Conference (Dr. Sidney Smith) as vice-chairman, and the Director of the Wartime Bureau of Technical Personnel (Mr. H. W. Lea) as secretary. This Board met on January 6, 1944, and its recommendations have been incorporated in Interpretative Letter No. 7, dated February 10, from the Director of National Selective Service to the Chairmen of the Regional Mobilization Boards, of which a copy has been received by the University.

The letter makes no reference to women students. Male students subject to call by the Mobilization Board may, as before, continue until graduation courses in medicine, dentistry, engineering, agriculture, and honors courses (or courses in preparation for honors courses) in mathematics, physics, chemistry, biology and geology. To the foregoing have now been added pharmacy, education, and commerce.

Male students omitted from this classification include all law students, and students in arts and science not taking, or preparing to take, the honors courses specified above. The regulations state, however, that a student in this group will be regarded as pursuing a course essential to the national interest if the final examinations for the session 1943-44 place him in the upper half of all the students enrolled in the same academic year of his course. It is presumed, though the regulations ar not explicit on the point, that once students are classified as "essential" by the foregoing process they will have the right to pursue their courses until graduation. The regulations do state that new students enrolling in these restricted courses in 1944-45 are to be sifted in the same way at the end of that session.

The following numbers of male students were enrolled this 

Other Arts and Science

The figure for 3rd Year Arts and Science includes only honors students going on to a fourth year. Students expecting to graduate this spring will not be affected by the new ruling.

Of the members shown in the foregoing table, the following have already withdrawn, either voluntarily or upon report to the Mobilization Board:

1st Year 2nd Year 3rd Year Pre-medical Other Arts and Science

The numbers to be reported in the spring will apparently be about half those given in the first table, less the numbers in the second table, since the regulation classes as "essential" half of all the students enrolled this session in a given course and year. The phrase "about half" is used, as the exact number may be modified by the relative distribution of men and women in the upper and lower halves of a class.

As the effect in some cases would be to reduce the members below the point at which satisfactory teaching is possible, the University of Alberta intends to press for a reasonable floor under each course and year, with the further proviso that the numbers of pre-medical and pre-dental students should not be reduced arbitrarily below the quotas of these schools. The University is also proposing that second year students be treated less drastically, since they have already been through a sifting process in their first year.

The general regulation with regard to all male students doing satisfactory academic work and fulfilling military training requirements is unchanged. However, students reported to the Mobilization Board and rejected for military service may, with the permission of the local National Selective Service officer, apply to the University for readmission.

The new regulations must be regarded as a compromise between two mutually exclusive national needs, that for educated personnel at a later date and that for additions to the manpower pool today. They will work a temporary hardship on some students who are real university timber and are nevertheless prevented from continuing their courses. Those who enter the armed forces at the end of the session will earn the right to return to the University after the war with financial assistance from the Dominion Government. It is earnestly hoped that students may not yield to discouragement at the prospective disruption of their plans, but make the most of their present opportunity. A university year completed now will see them that much farther ahead after the war.

ROBERT NEWTON.

The final program in the Musical Club's series of music of the nations will take place Sunday evening, Mar. 5th, at 9 p.m., in Convocation Hall. It will feature works by Russian composers as interpreted by a group of well-known Edmonton artists, including Nelda Faulkner, Naomi Wershof, Lucille Cate, Frances Kitchen, Prof. Nichols, Egon Crapentin, and Mary Drummond Hatlen. Mr. ROBERT NEWTON.

February 17, 1944.

## Editorial

Liberal education cannot remain for any great length of time as part of the curriculum of the University of Alberta if we continue to so deliberately discourage students from taking Arts courses. In the latest regulations Arts and Law courses are not on the preferred lists. Students enrolled in these faculties bear the brunt of the attack by the War Service Board, the Government of Canada and by the University Boards on war-time University students. These courses are the useless courses as contrasted with vocational training, and consequently we are tending to raise a generation of technicians rather than a generation trained to be citizens. President R. H. Hutchins of the University of Chicago said in a recent address: "If we raise a generation of technicians, however skilled, we shall no more be capable of governing ourselves than the Nazis intended the Germans to be. German technology has been and continues to be under fascism, the wonder of the world. Technical skill is useful and important, but it is not enough to enable a man or woman to be a citizen rather than a subject."

We would like to make clear now that we have no

quarrel with the science courses as such—we agree that they are important, very important for the winning of the war and for the maintenance of peace after the warbut we do take our stand definitely against any action, government or otherwise, that tends to list as unimportant and that tends to cause the withdrawal of courses which aim to prepare future citizens to think clearly and independently on the vital issues of life. We do oppose any action which tends to encourage the growth of a materialistic philosophy to the downfall and exclusion of the humanities. In a talk given in 1942, President Carleton Stanley of Dalhousie University had this to say: "Some have held indeed that the spirit of a nation or a race grows fatigued; that Shakespeare and Milton are not followed by men of their own stature, and that a people is happy if the next generation lets poetry lie fallow, while a Royal Society plants the seeds of science. Such an analysis seems to me to leave too many things out of account. Among other things, it leaves out of account the schools and universities of England and Scotland. These schools and universities were almost entirely devoted to 'liberal' education. Schools and universities may have 'liberal' education. Schools and universities may have been too much the preserve of the well-to-do, but it was through them, after all, that the English Bible became the book of the people. And while they and their influence lasted, the field of poetry was not lying fallow, nor the field of philosophy, nor the field of mathematics and astronomy, nor the field of law. Not least, they were the nurseries of parliamentarians. Schools and universities are, in the nature of things, a conserving forcee. For, schools and universities which do not confine themselves to professions and techniques are concerned shiefly with to professions and techniques, are concerned chiefly with the nature and dignity of man. Conservative, yes; for they teach and learn first principles, and the use of the processes of reason. So at least it has been over long periods in France, and England, and Scotland. Such schools and colleges are the surest bulwark of Freedom.'

We have been assured that the number of students affected are few in number. As if that was the thing that mattered! The Christmas exam regulations were strict enough to eliminate any slackers that might have been hiding in the University, and at that time Col. Warren prophesied that no more than fifteen men would be required to leave since entrance requirements were severe and since in the upper classes the weaker students had already been withdrawn. Unfortunately, he was wrong. But now this new move. Just what are the authorities trying to do? It is too easy and not conclusive enough to say that these students are going to swell the manpower pool. There are too many obvious answers to such a statement. It can't be said that our students here are not conscientious and are wasting their time. There must be another reason. Surely it is not that the authorities are so short-sighted that they are not looking beyond the immediate problem. Why, then, are we holding post-war reconstruction conferences? There are too many questions to be answered before the students can swallow this latest movement as an innocent gesture. If these courses are useless, why not stop them entirely and do it in an honest manner? Why encourage a student to come to University at one moment, filling him with glorious phrases about playing a role in the post-war period, about being better able to aid at the present time, about Canada needing men who are thinking men and who live above the fog, if at the next moment they are going to be ousted from the courses they choose to follow?

Because we believe we protest. We must protest. If the Arts courses and Law courses are to be slowly but surely strangled, what will replace them?

Perhaps we may take a measure of consolation in the hope that the suppression of the humanities will cease with the war. We hope so. Meanwhile, we protest that a Liberal Arts course is dying out. "Cry havoc, and let slip the dogs of war!"

## Russian Music At appearance on the club's programs for this year in response to popular

QUERY

HEADS MAGAZINE DRIVE

Chairman of the Magazine Drive which is being held on the campus, with the Dental Undergraduate Sowith the Dental Undergraduate So-ciety running the show. Cotter an-nounces that in the first two days of the drive almost 1,000 magazines were brought by students. The drive is continuing, and it is hoped that more students will respond to the appeal for old and new magazines.

#### Magazine Drive In Full Swing; 1,000 in 2 Days

First two days of D.U.S. magazine drive sees 1,000 magazines collected for the forces. But this is no cause for relaxing our efforts; we must make the daily total bigger and bet-ter as the campaign continues.

ter as the campaign continues.

Much of the success so far has been due to the student spirit in response to our loud-speaker, ably handled by Bob Blaquiere. Bob has been on deck these last few days blasting across the campus about the need for magazines, and he'll be there until the drive is over. Many have responded to Bob's pleas for magazines, but we need many more, so give students—give.

forces need more relaxation-magazines equal relaxation—so give ma-

'Don't delay-bring those magas-zines today.

#### **Council to Provide** For Minor Award

Notice has been given of a pro-posed amendment to the Point Sys-tem Act of the Constitution to the

following effect:
That students obtaining seventyfive points and being in their
Senior year should receive an indication of merit in the form of a silver ring.

Applications for this award from students affected will be received by the Secretary of the Students' Union Office up until Tuesday, Feb. 22. Students are referred to the Point System Act in the Constitution for information regarding points. J. FORSTER.

#### W.S.C.F. SUNDAY

This coming Sunday (tomorrow, in fact) various students of the University will be addressing many of the city's churches on the occasion of the World Student Christian day of prayer. On this particular day, members of the Federation all over the world, in belligerent countries on both sides, and non-bellig-erent countries alike, are demon-strating very practically the prin-ciple of "one world." At this par-ticular moment in history that there is any such movement as the W. S. C. F., and that it is a student, Christian group of people is gery significant.

Music Club, Mar. 5

A slate of officers for 1944-45 will be presented at the meeting, so it is hoped that as many as possible of what he Federation is doing, and what a world day of prayer implies. what a world day of prayer implies. Overtown papers will have a more complete announcement of where the students will be, but here is the list we have at press-time:

Erskine United — Miss Frances
Clarke, Mr. Cliff Harrison,

Christ Church (Anglican) - Mr. Ernest Nix. Strathcona Baptist—Miss M. Suth-erland, Miss Fran Holdom.

## New Regulations Approved By Univ. Advisory Board

Will Not Affect Preferred Courses

ED. NOTE: These regulations are reprinted from the Manitoban and are the original text as issued by the University Advisory Board. The way in which they are interpreted at the University of Alberta appears elsewhere on this page.

New regulations relating to the mobilization of University tudents have been issued by the Director of National Selective Service (Mr. Arthur MacNamara), President Smith has an-

These regulations were recommended to the Minister of Labour, the Honourable Humphrey Mitchell, and the Director of National Selective Service by University Advisory Board,

composed of six representatives of Canadian universities.

It is by way of implementing the statement of Sept. 15, 1943, by Mr. MacNamara, that the following regulations have been

recommended and approved.

1. Any male student of the age of 18½ years or more, who is subject to call under the National Selective Service Mobilization Regulations and who is enrolled in any of the following degree courses in any Canadian University or college, shall be considered to be pursuing a course contributing to the prosecu-tion of the war or in National interest:

(a) Medicine,

Dentistry, Engineering or Applied Science,

Architecture, Agriculture,

Pharmacy,

Forestry, Education,

Commerce,

Veterinary Science, Specialized courses in Mathematics, Physics, Chemistry, Biology, or Geology, or in courses which enable students to prepare and qualify for specialized courses in Mathematics, Physics, Chemistry, Biology or Geology.

2. Any male student of the age of 18½ years or more, who subject to call under The National Selective Service Mobilization Regulations and is enrolled in any degree course not enumerated in paragraph 1 above, will be considered to be pursuing a course essential to the national interest provided that in the regular session of 1943-44 he is in the upper half of all the students enrolled in the same academic year of his course

as determined by the final examinations for the season.

3. Any male student of the age of 18½ years or more who is subject to call under The National Selective Service Mobiliz-We're off to a flying start, and with the campus clubs, fraternities and every student behind the drive as never before, there is no limit to the magazines we can collect. The year of his course as determined by the final examinations for the session.

4. Any male student permitted under the above paragraphs to continue his course shall be reported to the appropriate mobilization authorities under The National Selective Service Mobilization Regulations if he fails to do satisfactory academic work or fails to comply with the requirements of military

5. Any male student who has been required to leave a university or college by reason of the application of paragraph 2, paragraph 3, or paragraph 4 above, and is subsequently rejected for military service by the Mobilization Board con-cerned may be permitted by a university or college to resume his course provided that he presents a permit so to do issued by the appropriate National Selective Service Officer.

6. No male student of the age of 181/2 years or more who is subject to call under The National Selective Service Mobolization Regulations, who is enrolled in a university or college for the regular session of 1943-44 and who is doing satisfactory academic work and complying with the requirements of military training, shall be called under The National Selective Service Mobilization Regulations until the end of the regular session of 1943-44.

7. No male student of the age of 18½ years or more who is subject to call under The National Selective Service Mobilization Regulations who had been enrolled in a university or college and subsequently ceases to attend a university or college for a period of one academic year or more shall be re-admitted to a university of college without the consent of the Mobilization Board concerned.

President Smith stated that the most significant feature of the new regulations is to be found in the official recognition by the University Advisory Board and the Director of National Selective Service of the essential character, in terms of the national interest, of the work which able students are doing in the courses leading to the degree of Bachelor of Arts, Bachelor of Science in the General Course, or Bachelor of Laws. A man of callable age who comes in the upper half of all the students enrolled in the same academic year of one of those courses shall have his call postponed and he will be required to continue his course until graduation provided that he does not fail thereafter to do satisfactory academic work or to comply with the requirements of military training.

President Smith also remarked that these new regulations are based on the principles of Selective Service for the benefit of the nation. They are not designed for the benefit of the universities or their male students. In complying with the regulations, Canadian universities are preparing—as no other institutions can prepare-trained men needed in the national effort.

Wesley United-Mr. Art Boorman. Also, Prof. E. J. Thompson will speak on the W.S.C.F. at Knox United, and don't forget the student service at Metropolitan United with Gerry Hutchinson and Hazel Moore. Dease turn in to Gateway Office.

#### PRESS CENSORSHIP

On the Saturday morning of February 12 a CBC News broadcast stated that Dr. Sidney Smith, President of the Universities Conference, had announced certain changes which were to take place in the regulations governing Canadian University students, affecting those students registered in Arts and Law. We were not too greatly surprised because we had been made aware that certain changes were pending, and while we did not know the nature of the changes we did know that they would affect the Arts faculty. You may wonder why, as the official organ of the Students' Union, we did not release this knowledge to you. There is a good reason. We were told at that time.

Many students do not realize that we are not at liberty to print what we wish, but that we are subject to a strict censorship. Capt. F. Owen, Intelligence and Security Officer of the C.O.T.C., carefully reads each publication, and if he finds any item which he believes tends to confidence. reflect on the military organizations, or on the government or which tends to be a violation of the Defence of Canada Act, he reports it to are other censors-non-official. Statements are made confidentially from time to time by University officials—"not for publication."

We first learned of the intention of the Selective Service Board to take more severe exam regulations last December. At this time the matter was "not for publication," and there- ZING AND SWISH fore we remained silent. When the CBC news burden of acting as sole judge in selecting the Queen reported the latest regulations, we immediately visited President Newton, who pointed out that this news should not be given undue attention, as there was enough "alarmist" material being published. We wired across Canada, but appublished. We wired across Canada, but appublished. We wired across Canada, but appublished. We wired across Canada, but appublished when the state of Manitche was a feet of the Arts Ball at the Royal York. Charlie is his name, and this is what he has to say: "Charm, that's what I like. Charm. Call it what you will. Swish. It. Oomph. Give it any funny-sounding name you will. But it all boils down to the intangible essence called Charm." When asked "What is Charm?" parently only the University of Manitoba was he said, "Charm is not a mere physical feature. It may released the report on how these regulations are to be interpreted for the University of Alberto, the list of regulations worm and it is, in short, that amenity which indicates that a woman is socially in the groove." Charlie doesn't profess to be a "know-it-all," but claims that he does Alberta: the list of regulations were reprinted possess definite astute tastes. from the Manitoban. This is the history of The Gateway's part in this news story. We hope students will understand why they were not informed of the pending action earlier.

#### EDITORIAL SQUIB

"These are the principles which will continue to inspire the youth of every land. They have been the dreams and projects of students for libel within the memory of students now enrolled, through the ages, but in the victory now to be won and the peace to be secured there is a practical task for the young people of all countickets to the Victoria College At-Home. tries. In their co-operation they have a special HIGHLIGHTS mission. They must know that there are in the world great regions where a whole genera-tion of young men and women have been destroyed by a crooked and ungodly tyranny. thusiastic youth they must replenish the in- the inspecting officer towering over a corporal. tellectual vigor of stricken lands, and with the clear eye and firm hand of youth they must hand you like best about the C.O.T.C., my lad?' help create that better world toward which we strive."—International Youth Assembly.

### News and Views From Other U's

#### Canadian University Press

#### RELIGIOUS THINKING

From the "Collegian" of Walla Walla College we noticed this heading, "Modernism vs. Scripture," and the following: "Students are concerned about the discords that have arisen in their religious thinking. They cannot be satisfied with a religion claiming authority only on the bases of tradition or based solely upon Scripture. They want a rational belief.

This editorial from The Gateway, published by the Students' Union of the University of Alberta, is characteristic of the confused thinking prevalent among institutions of higher learning. Comparatively few students of today can say with certainty, "I know whom or what I believe." Modernism has befuddled many minds. Christianity is said to be unique in its historical setting, but not practical for everday living.

As a denomination or as an institution we should not remain egotistically aloof from religious confusion and indecision manifested by so many honest hearts. Our own souls are in jeopardy when we fail to com-municate to others that which has made us free.

Fortunate, indeed, are those whose religion is based not on tradition or custom, but on the "thus saith the

#### **ENGINEERS' STEW**

The engineers at U. of Utah are preparing for their annual oysterless oyster stew. Queens will rule, of After the dinner, decisions will be made regarding the beard growing contest. The chief factors being considered in this are length, width and bushiness. There will also be prizes for th best goatee the most artistic beard, and the "most effort and least result" beard.

#### COLLEGE CLUB

There is to be a new and different Varsity function at U. of Saskatchewan. Convocation Hall is to be changed into a dazzling night club. A red plush carpet will lead to the doors, attended by a liveried door-man, complete with white gloves and a dead-par expression. The hall itself will be elaborately corated with palms, ferns, flowers and shaded lights. Tables for the 150 guests will be around the walls of the hall. Souvenirs, novelty menus, cigarette girls will add to the enjoyment of the occasion. Admission is \$1.00 a couple for the evening's entertainment.

#### COLLEGE SPIRIT

This editorial appears in the Varsity: Along with the attractions of a higher education getting a degree, and playing on university sports teams, Canadian and American universities were known for one great thing before the war-College Spirit; the spirit that would bring out hundreds, indeed thousands, of students and co-eds to watch and cheer a football team; the spirit that would make every dance, be it formal or informal, a great success; where students would get together in the centre of the dance floor and give their college yell; the spirit that made universities rather hectic, but certainly enjoyable

With the war and the introduction of military training, this spirit slowly died. It died for that reason, but also because it was an effort to keep it going, and a war was a welcome excuse to stop organ-

izing everything to the last minute detail.

For four years McGill did little or nothing to revive its College Spirit. Last week the Athletic Board took you. There is a good reason. We were told the first real step towards an improvement. The that this information was not for publication Athletics Festival found over a thousand students in the gym, cheering their basketball team, and when, during the dance that followed, everyone gave the McGill yell, it sounded as though the college days of old had come back suddenly, as though a man or a girl who goes to lectures and labs on the campus was

once again proud to be a McGill student.

The Athletics Board is to be congratulated for

seek above all else to teach men to think. There are military headquarters. Reports on Gateway entirely too many students who approach university articles have been submitted in the past and we have been called to give an account. There we have been called to give an account. There courses which lead to the service of the non-material needs of man; leaving as inconsequential the educational, literary and governmental fields. Their classes are no stimulus to further effort, and the incentive to do any thinking on their own is fast disappearing. #### Why Study Physics?

By Prof. R. J. Lang

At the outset I must repeat, what has been emphasized by other writers in this series, that whether we study physics for its cultural values or for its practical uses, we must first obtain a considerable knowledge of the facts either from personal experiment or, which is more likely, by the study of the experiments of others, and only afterwards can we make our generalizations. This cannot be too clearly stated now in view of us some idea of the direction in certain tendencies in our schools. Is there any sense, for which professors "travel hopefully." example, in discussing the Conservation of Energy while we I have learned a good deal, as well, example, in discussing the Conservation of Energy while we have as yet no glimmering of the manifold forms which energy may assume or how the simplest transformation from one form to another occurs?

But in physics the facts are not easily come by. Most students would say, I think, that physics is the most difficult students would say, I think, that physics is the most difficult of futility and despair, such as men subject in the curriculum. In itself it is an exact science, which travelled through the last war?" I means that it is based upon experiment and that its definitions am not very hopeful, myself, about and laws must be stated precisely so that anyone anywhere the possibilities of a secure and and laws must be stated precisely so that anyone anywhere may understand exactly what is meant. But beyond this, physics makes use of the methods and much of the results of mathematics, a subject far from easy in itself for most of us. the educators helplessly floundering, But the necessary precision of thought and statement is one of vainly endeavoring to overtake their the great virtues of the science from a cultural viewpoint adversary? Suppose that inflation the great virtues of the science from a cultural viewpoint. Junior students may sometimes betray the feeling that the poor I have seen the restless misery of old professor is being pedantic about it. I venture to say, however, that many finish their classes with a new and pleasant the bitterness of his despair because feeling of mastery in the uses of language which they would he was engaged in work that he not otherwise acquire.

be rather tragic for even one generation to lose sight of it. physicists, stated that fundamentally There are some, however, who would question or even deny there is not much difference between any cultural value to the study of physics, but they are not a savage with his complete ignorance any cultural value to the study of physics, but they are not and helplessness before the phenophysicists. Which is better, let us say, to contemplate with mena of drought and disease and Eddington the titanic interplay of radiation and matter in the modern man before man-made disseething heart of a star which keeps it shining without sensible asters of technological unemploydiminution throughout the memory of man, or to say with ment and scientific warfare. Even in Keats:

Bright star! would I were steadfast as thou art-. . . . . . . hung aloft at night And watching with eternal lids apart.'

Well, it is a matter of temperament which we prefer, is it not? Many will always prefer one and many the other and some few, like the writer, will find it difficult to decide.

In passing, it is interesting to recall that when Keats was writing that last sonnet an equally youthful engineer, by name Fresnel, across the channel was laying the foundation of about everything that we know today about that elusive thing called

In the study of physics the student comes face to face with an intricate system of knowledge which is not in a sense manmade, but which he finds consistent and predictable. He infers that the underlying reality behind the knowledge is also consistent and reliable. The rules are not changed in the midst of the game. He need not become a modern Caliban cowering under a capricious providence. There is nothing in heaven above or in the earth beneath of which he need be afraid unless it be his fellowmen.

This leads me to write a few words about the international aspect of physics and of all science. At present, of course, physics and chemistry are the servants of nationalism, and after the war a threat to keep them so will remain. They were so in the war a threat to keep them so will remain. They were so in my appreciation of your trouble in parts of Europe before the war, and the first move in that send out those good of Gateways, direction recently appeared in the U.S.A. However, I have no list not for nought.

fear that it will succeed for long, and it seems to me that is not for nought.

As any Alberta boy knows, you direction recently appeared in the U.S.A. However, I have no and to advise you that your trouble An editorial in The Sheaf says: "Education should science should be interesting because it appears to be about the only international thing which we shall have left. It was to face with a brother the hope that economics and sociology, for example, might some from Varsity. And they all enjoy day attain the universal acceptance that physics enjoys, but we The Gateway, too. see now how these can be reduced to dark confusions for large sections of the people by dictators and fanatics of one sort or find them all over now. Several, for another. Unfortunately, unlike physics, they have no real instance, Jack de Hart and George touchstone outside the human mind. And what shall we say of philosophy? Does anyone doubt that it was bad philosophy A2 and George is at A5. I am at A1. Then again, I ran into George which placed Germany where she is today? All of these things are somehow bound up with freedom of the mind, and that and nationalism, it seems, can hardly exist any longer in the same world together. Pure disinterested science may form a nucleus around which the world can be crystallized again.

I need say very little about the practical uses of physics since we live in a physical world. Engineering is the application of the principles of physics and chemistry, and the result of the labors of engineers has been to lighten the drudgery and give us more leisure for other things. But some of us seem always in danger of coming to grief among the gadgets. There are people still who cannot take a bath without being electrocuted. For them a radio is a set of dials to be turned on or off like water or gas. If private planes become common, Joe Smith, and especially his wife, will really have to learn something about what is under the cowling or they may expect to

qualify rather quickly for other and more ethereal wings. What they will make of radar, heaven only

If current advertising may safely be taken as an indicator of the spread of general, elementary scientific knowledge, then the case is sad indeed. A modicum of such knowledge would surely make the most of advertising so ineffectual and ridiculous as to be discontinued The great majority, it seems, are open still to any sort of high pres-sure salesmanship, and what they suffer in the way of dishonest servicing was shown by the survey made by John Patric and Miss May

Finally, some few make physics a profession. To do this thirty years ago meant practically that one had to spend his life in a university, but industry meanwhile has been discovering the practical uses of the trained physicist, and positions are open in all branches of physics After the war there will be many more for those qualified to fill them. Engineering Physics promises to offer wide opportunities in industry and in some types of civil service.

"Faith and Fire Within"

Editor, The Gateway.

Dear Sir,--Last fall I wrote a letter to you, in which I suggested that the professors writing for "Faculty on the Spot" might answer the ques-tion "Quo Vadis?" I enjoyed the two articles which appeared in answer to that query—Dr. Winspear's on Nov. 5 and Dr. Macdonald's on Jan. 21. The current series, "Why Study My Subject?" also gives from the professors whose lectures I attend, about "the faith and fire within."

There is just this point, however. "What can they tell us of how the spirit is nourished in a waste land stable society when this cruel war is over. What if the race between education and disaster again leaves comes, and then another depression? young man unemployed; I have felt knew to be beneath his abilities The cultural value in the study of science, and in physics in my throat," he said, "with a heart

we understand something of what is happening to society, it seems to me that we need an inner stability in a world of change. What I am try-ing to discover is other people's "hid security," and, in time, to arrive at some such steadfastness myself. am inclined to think with Phyllis Bottome, writing of a character in "A Certain Star": "She took unhappiness more easily—in her heart, even now she believed in it. She believed that the balance of life is against joy, that destiny and fate prey against it, overcloud it and sometimes destroy it; and she believed that human beings can adjust this balance. She believed in a success which is independent of life, an invisible and permanent success. Thanks once again to Dr. Winspear

and Dr. Macdonald and the others

Sincerely, E. N. T.

Dear Sir:

The Gateway is continually catchcreditor as persistent. Anyway, enjoy being chased.

This is just a short letter to show

| Hardy, Bill Payne and Lloyd Smith and Lloyd Gardiner in my recent stay in Brandon. Oh, yes, and Ross Bishop, too.

Last week-end I went to Ottawa and had quite a talk with Doris Thompson (last year's vice-president). She's working with the Civil Service-but not for much longer.

It's good to see that the Commerce cids finally have a column devoted to them. Also to see that the Spanish Club is still going.

Well, if I keep this up I'll never get any studying done. (Does that sound familiar?) It so happens I am taking a course in Survey(shades of the Engineers!)—but I hope the Commerce students will still talk to

By the way, in a letter published in The Gateway not so long ago, Neil Holmes referred to me as George. The name is Gerald—but I guess I should tell that to Neil. was also sorry to hear about Gord Pybus—he was a swell guy. Last August, James McCormick died in Sicily. He was my classmate in commerce for a while.

Well, I must away to my books. Thanks for The Gateways—and keep em coming, please. Yours,

(Signed) GERALD KENNEDY, (Commerce '43)

And someone has requested that re reprint this old favorite: I sat by the Duchess at tea; It was just as I thought it would

Her rumblings abdominal Were something phenomenal, And everyone thought it was Me. ---Argosy Keely.

#### On Coming Alone to the Mixer

When in disgrace with fortune and men's eyes You all alone beweep your outcast state, Don't trouble deaf heaven with your bootless cries, And sit at home alone and curse your fate, Wishing to be like her who does not mourn. Featured like her, like her with friends possessed. Desiring this girl's eyes, and that girl's form, With what you most enjoy contented least; Yet in these thoughts yourself almost despising, Happily think on him,—and then in state, Come to the Mixer, at start of dance arriving, From sullen earth, he sends to heaven's gate; McGurgle will sing, and he such sweetness brings That all the girls do answer and their echo rings.

## In Defence of Judy

MR. SYDNEY BURNHAM

and everywhere his preaching and

dealing with the tremendous issues

has a vital message you must not

miss. An invitation to attend is extended to all students.

"Oh, I don't think he's so hand-

some."-Lafayette Lyre.

I should like to reply to last week's | search through the library to see "Are You Kidding, Judy?" I hap-ben to know the Freshette who economy or chemistry—a misogy-

"Are You Kidding, Judy?" I happen to know the Freshette who wrote "Judy Goes to Varsity."

In the first place, Mr. X, you will have realized that Judy is a fictitious character. The writer is not Judy. Whatever she wishes to say about Judy is her affair. It is not a matter of "opinion." We haven't any right to say that the author thinks or feels as Judy thinks or feels. Nor is it necessary for her to tell us whether she considers her imaginary character to be typical of Freshettes in general, or to be a genuinely individualized character. You, of course, may have your opinion about what a Freshette feels like on first coming to University, but you cannot say that you are right and the author of Judy is wrong. The manner in which you have expressed your "difference of content of the property of the content of the property of the proper have expressed your "difference of opinion" seems to me to be thoughtless and unfeeling. Judy is not a real person, but the author is.

Yes have less than the second of t

You have learned that our buildings are "architectural monstrosi-ties." Have you not learned that it is possible to have an affection for these halls, in spite of their darkness and narrowness, because in them you have been happy? But, of course, you are morose, unshaven, hungry (poor lad), worried and sus-picious. Evidently, you cannot answer for the professors, in saying that they get tired of helping people

such as Judy.
Your sixth paragraph, Mr. So-and-So, seems to have nothing to do with the Judy article. You have He has addressed large audiences all Levant did not exist, he could not hours. Once when he parked himgone off on a tangent, to rail against over Britain, in the East, New Zea-co-eds in general. We shall have to land, Australia, and America. He is Oscar came

tayed another two years.

#### BERUFFLED AND BEAUTIFUL

Be ruffled, this spring. Be beautiful, this spring. A few frills, bows and cupid collars will smartly offset that blouse and skirt that pows and cupid collars will smartly offset that blouse and skirt that are now doing wartime long wear. They add a touch of freshness, and a crispness that rivals the atmosphere of spring. And a new blouse itself, plus a few necessary accessories, such as plain, good quality gloves, a pair of well fitting oxfords, may be all one can afford for their new spring wardrobe. A little imagination goes a long way in economy.

#### **STUDENTI**

Yehudi tore himself away from the interesting magazines in the boxes long enough to do his weekly duty by the students. There's only one thing wrong with these magazines—no Varga girls in the well-thumbed Esquires. Is that being kind to the armed forces? And while on the subject, Yehudi wants to say that anyone who hasn't a paper girl of his own, may have a look behind the door of The Gateway office. But hands off! Thanks for the tip about where to find a calendar, Miss Winspear. At the moment the February girl—a smooth chick—is my wall flower.

Thanks for the Valentine signed "Susie". Will meet you outside the Library as you wish, at 9 a.m., Monday, February 21. Please wear a large green orchid so that I will know who you are. Myself, I will wear my usual intelligent expression.

A rabbit named Mike, who is a close friend of my brother's, told me the following short story: There was a lady who went to her frigidaire one

day and opened the door. To her amazement she found a little rabbit sitting there (a close friend of Mike's).

She said: "What are you doing here?"

Mike's friend replied: "This is a Westinghouse,

She said: "Yes, why?"
The rabbit replied: "Well, I'm just westing."

Yehudi is planning an anti-hands-holding campaign. All those with guilty consciences, please note. Holding hands will be tolerated only in dark places (such as physics labs.). Please refrain from twining digits in halls, on the street (in broad daylight), and especially during lectures! Oh, well, after all, as Dr. Cantor says, "Love is gland!"

by YEHUDI Yehudi was walking home from Little Tuck on Valentine's Day when he saw a mob of women sur-rounding one little man. Your old friend was just going to rush to the rescue, when someone shouted out that it was merely the House Eccers taking Dr. Walker to Tuck. Yehudi went home feeling sorry for

Chemistry professors. When Yehudi was wandering around the University last week he saw a well-known figure toting a large bottle of chloroform. Asked why, he replied shyly,

Well, I've tried candy, and I've tried flowers . . Yehudi came across the following poem expressing his opinion on love:

"One reason for my single bliss,
After thought, I find is this:
Each girl I've had a liking for
I've soon deduced was either/or Too fat/too thin, too meek/too bold, Too tall/too short, too young/too old.

The other reason is that she Has found the same thing wrong with me.'

But other people seem to have more luck. F'instance, Don Harvey and Mary Soper are looking lovingly at each other. And in the Art's Rotunda, Yehudi saw that lucky Gordon Weir surrounded by Ann Miller and Doris Kerr.

Here's a thought for all the tired people that will

be around next week:
"The Junior is a memory, The Senior's come and gone,

And so we start life over— Overtired, overfed, OVERDRAWN!"

#### What's Wrong with the GATEWAY?

What's wrong with The Gateway:

1. Too much feminine and infantile gush supposedly humor Let's have the female touch, but keep it from becoming Sina-

 How about a cartoon every week.
 Suggest the paper not be afraid of lampooning students and faculty. Sermons not read by students, unless heraladed by

4. More news pictures of news around the "U". Especially sports. 5. Articles giving student opinion on events overtown. Erase

that public opinion of the horn-rimmed and cloistered student. JIM SPILLIOS.

It is very flattering to have the Features Editor of The Gateway ask me to offer a few lines of "Constructive Criticism" on

tive procedure they could adopt would be to hire some modern Pied Piper (Frank Sinatra for instance) and lure their entire ensemble over an appropriate portion of the High Level Bridge.

However, there are other alternatives (unfortunately). If The Gateway were to model itself after that dynamic little publication "The Orphan," it could do no better. The light type of articles, straight to the point editorials, ample and personal news coverage, along with the friendly personality of the whole paper, endear it to all its readers. The staff of "The Orphan" are to be congratulated on their efforts to keep the torch of journalism aflame on this campus. (How am I\*doing, Jamison?). journalism aflame on this campus. (How am I-doing, Jamison?)

Seriously, I'm sorry, gentlemen, you've asked for constructive criticism, and under present conditions I'm in no position to offer any. The University student today seems to be carrying a chip on his shoulder, and at the mere drop of a hat he is on the warpath. The offering of any criticism would only leave one open to enmity and "blasts" from all corners, and I, at least, would like to spend my last few hours here in peace.

Applications Sought as a "basic training centre," which is of university standard. I will not attempt to add to this, but personally, Latin is one of the more advanced and specialized training of university, it stands to reason that the student will do better in university if he receives such training in high school as will be a considerable loss to the students of this province.

Before I make any suggestion, I want to say that I think we had an exceptionally good Gateway this year. Although the student of the more advanced and specialized training of university if he receives such training in high school as will be a considerable loss to the students of this province.

Applications Sought which is of university standard. I will not attempt to add to this, but personally, Latin is one of the most interesting and useful courses I have training of university if he receives such training in high school as will be a considerable loss to the students of this province.

The National Research Council interesting and useful courses I have training our high school curriculum it would be a considerable loss to the students of this province.

The National Research Council interesting of an award by the National Research Council is of university standard.

I will not attempt to add to this, but personally, Latin is one of the most interesting and useful courses I have training of university if he receives such training of university if he receives such training in high school as will be a considerable loss to the students of this province.

The National Research Council interesting and useful courses I have training of university if he receives such training of university if he receiv few who are trying, at least, to do their job here (Council, Gateway and all) do not go unappreciated by the student body.

have had an exceptionally good Gateway this year. Although is of university standard. there have been various individual articles and features that I have not cared for, the Editor and his staff are to be complimented, for the paper on the whole has carried an interesting news coverage and a varied series of articles.

Assuming that there are no practical difficulties involved, would it not be a good idea to publish The Gateway on Wednesday of every week? Most campus activities appear to take haps it would be possible to write up the events of the previous week-end before they became old news, and those of the coming wonder, but not enough to give any real assistance in choosing his job. week-end that they may receive due publicity before they take

BOB BLACK,

'42-'43 Secretary of Students' Union.

Casserole is back in The Gateway, and that is as it should be. But unless you find it handy for filling vacant corners, I suggest that it be put under one heading. There is another much-read bit of The Gateway, namely, the theatre directory. But it would be much handier if it covered a few more of the theatre directory. The covered a few more of the theatre directory. But it would be much handier if it covered a few more of the theatre directory. The covered a few more of the theatre directory. But it would be much handier if it covered a few more of the theatre directory. The covered a few more of the theatre directory. But it would be much handier if it covered a few more of the theatre directory. The covered a few more of the theatre directory. But it would be much handier if it covered a few more of the theatre directory. But it would be much large and a reducing school, but many go through school without having made any attempt to solve the problem of life work, and without having made any attempt to solve the problem of life work, and without having made any attempt to solve the problem of life work, and in return for your money we are offering you the Canteen Mixer. It's fund. All you need to do is buy a beticket and come. Come alone, come with girls, but be success, come with girls, but be success, every student must buy a believe that greater stress on vocations of war, in the fund of of the work involved, or the qualifications necessary. I believe that greater stress on vocations of without having made any attempt to do so once more, and in return for your money we are offering you the Canteen Mixer. It's fund. All you need to do is buy a ticket and come. Come alone, come with possible problem of the vising school, tend to drift into the in school within one of the work involved, or the prosecution of the war.

Under under of the work involved, or the problem of its from the conformation of the work in vising you to do so once more, and in return for your money w theatres. Lastly, I feel that The Gateway can stand a reducing diet for the duration. In view of the drastic cuts that have been made in most of the leading newspapers, I do not believe The Gateway should have a middle leaf except on very rare occasions.

believe that greater stress on vocational guidance in high school would help the student to pick the unipob of helping students less fortunate than us. To continue their suited, thus benefiting both the community and the individual.

With regard to (2) there has been made of the drastic cuts that have been work every student on every sudent on every campus must get behind every drive.

But it would be indeed in an existing award, and a grantee may not accept employment outside of a university after an every course for which he is best suited, thus benefitting both the community and the individual.

With regard to (2) there has been made to him, or because of successive awards.

Well, that may be tougher to do than beating Saskatchewan in basketball. Anyway, I'd like to see at least half a page scraping the surface of devoted to good philosophy and poetry. That's out of my line I am convinced that it is extremely (Dentistry), I know, but I think if properly selected it would be a slight improvement.

Remember—keep the 26th open and life everywhere. Besides, for something that's dead, Latin puts up

Then for the Sports Section. A few action shots of games—
Interfac hockey and basketball, wrestling, etc., and a weekly resume of what the various athletic clubs are doing—have play—

"Really, I can't play golf," the Latin student. Dr. Hardy, in The Gateway of Feb. 4th, showed how much Latin helps one in doing work

"Really, I can't play golf," the sweet young thing said. "I don't even know how to hold the caddy."

THE WAILING WALL

We had always thought that the idea of a university is to provide a place and facilities for serious-minded persons who wish to increase their knowledge to do so. Whatever their interests may have been when they arrived at the centre of "higher learning," there they met men wiser than they, and other students with whom they lived and learned, and these influences, together with the matter which they undertook to learn, combined to produce, finally, an educated man. These materially unproductive years in the person's life were supposed to be very valuable to him and to the community at large in many ways, tangible and intangible. Indeed, the community sup-ported the universities financially. Most of the men and women came to the universities with a serious

their publication.

At the present stage of the game, I think the most constructive procedure they could adopt would be to hire some modern

The I have a few lines of the universities with a serious purpose in view.

But now it appears that in order to preserve the life of the community we must sacrifice the idea on which the society is based: Freedom of thought, of speech, and the control of the community of the first extra the first extra the first extra the first extra the control of the community we must sacrifice the idea on which the society is based: Freedom of thought, of speech, and the control of the community we must sacrifice the idea on which the society is based: Freedom of thought, of speech, and the control of the community we must sacrifice the idea on which the society is based: Freedom of thought, of speech, and the control of the community we must sacrifice the idea on which the society is based: Freedom of thought, of speech, and the community we must sacrifice the idea on which the society is based: Freedom of thought, of speech, and the community we must sacrifice the idea on which the society is based: Freedom of thought, of speech, and the community we must sacrifice the idea on which the society is based: Freedom of thought, of speech, and the community we must sacrifice the idea on which the society is based: Freedom of thought, of speech, and the community we must sacrifice the idea on which the society is based: Freedom of thought, of speech, and the community we must sacrifice the idea on which the community we must sacrifice the idea on which the society is based: Freedom of thought, of speech, and the community we must sacrifice the idea on which the community was a second to the community we must sacrificate the idea on which the community was a second to the community was

As to (1), I believe that the

present course in vocational guid-ance is too limited in scope to be

effective, and should receive greater

tress in high schools. Since only

two days per week are devoted to this subject, the amount of ma-terial covered is also limited, and

the student receives enough train-

to the life of the nation," that "we will need trained men after the war," and that "we need trained men now," we devise a training system that looks about as much like that of a true university as like life in an ant-hill, and keep it strictly sub voce. It nevertheless becomes increasingly clear that what we are interested in is not an informed, active, educated body of citizens who are able, because they are informed to take an active, intelligent place in the life of the nation, but rather, a Spartan economy in which men are selected to perform a function for which we train

Aha, another malcontent, you say! We are a malcontent, and admit it freely. We are not mal-adjusted, however, unless being profoundly ashamed by some widely-held opinions and movements approved by the many, is being mal-adjusted. We are sorry that when this country has a policy it is afraid to announce it: that when it wants a technical school it calls it a "university" to hide behind tradition and mistaken belief. We are sorry that the universities accept (or at least do not protest against) compromising restric-tions on their very function. We are sorry that students come in good faith to an institution they had thought to represent the highest and best in the nation's thought, only to discover equivocation and something less than honesty in return for their good

"They say" that registration in all years will be cut in half next fall.

#### **National Council Grants Basic Training Centre** Research Scholarships; **Applications Sought**

The granting of an award by the National Research Council does not exempt a grantee from the provisions of the University Science Students Regulations, 1942, or the Na-Sponsor Dance In Aid of I.S.S. tional Selective Service Mobilization Regulations. Attention is particu-larly called to Section 12, Sub-section 6, of the latter which provides that no student shall pursue post-graduate studies in any subject, un-less in the opinion of the university the student receives enough training and information to make him wonder, but not enough to give any real assistance in choosing his job. Fortunately, or unfortunately, some students have already chosen their vocation when they enter high school, but many go through school without having made any attempt to sking you to do so once more and

community and the individual.

With regard to (2), there has been some discussion as to the value of Latin for high school students. It has been called a "dead" language by dancing, superb entertainment by an area by the state of the mixer and be sure to come.

The evening will be high-lighted by dancing, superb entertainment by the state of the mixer and by dancing, superb entertainment by the state of the state of the mixer and be sure to come. be open to award to applicants who have graduated with high distinction in scientific study

Studentships of the value of \$650 will be open to award to applicants who have had experience in re-search work in science for at least one year following graduation.

Fellowships of the value of \$750 will be open to award to applicants who have given distinct evidence of capacity to conduct independent research in science.

Qualifications required are detail ed in the regulations governing awards. Applications should be strictly confined to candidates with outstanding records, both in their undergraduate and post-graduate

Travelling Allowance: Grantees who have to travel 300 miles or more may, at the discretion of the Council, be granted an allowance toward travelling expenses. ## New Regulations

ED. NOTE: The following is an Editorial taken from The Manitoban, the official student publication of the University of Manitoba. We print it because we believe it will be of interest to our readers, particularly those who are affected by the new

The interpretation given by President Smith of the position of the faculties not listed as essential in the new regulations is encouraging to those enrolled in a general Arts and Science course and in Law School, but it does not clear up some rather puzzling aspects of these Selective Service decisions. If those courses not in the list can be regarded as essential with respect to students in the upper brackets, and if, as we certainly hope will be the case, some sort of academic standards will be applied to the courses listed as essential, then where does the point of difference lie? Regardless of what course a student is enrolled n, there should be applied to his record the obvious question, s he making good use of his time at this public institution? One can see that in the case of a faculty such as Medicine or Engineering a student not in the "upper bracket" may be allowed to continue for the simple reason that there is a demand for his particular kind of skill in the war effort. But when a faculty such as Commerce is classified as essential and assumedly given privileges not accorded to Arts or to a certain part of Science, then we think that the regulations are unfair. A graduate in the general Commerce Course is certainly no more to be classified as technical personnel than a graduate in the non-"specialized" courses in Science. And the fact that a Course whose essence is the preparation of a student for general business life is classified as necessary to the war effort while the Arts Course with its far broader application to the needs of society and the individual is ignored, casts a rather dubious light on the scale of educational values held by the Dominion Government. In a very immediate sense, students who are specializing in Economics and History are necessary to the efficient administration of the war effort and in the reconstruction period both here and in Europe. Canada should be prepared to take a full share in whatever type of Allied Military Government is required in liberated Europe, and the men to represent us should not all be taken from the ranks of aging officers in the Pernanent Army.

The provision with regard to those in the upper bracket allows a large part of such students to continue to their final year, but at the same time, the lower half of all students in all years in Arts are to be forced to leave unless they are not liable for military service. If enforced strictly in that manner, then there will be unavoidable injustices in classes with a high general average. Students who conform to the general average of the class may still be in the lower half in a straight, numerical division. To that extent there is discrimination against Arts, certain parts of Science and Law. One can hardly criticize the efforts made by University heads to preserve the iberal arts. They have got very substantial concessions from the government in that regard. But the very fact that they had to make recommendations embodying a system with such discrimination, and that the government has issued the regulations in this form indicate the particular set of values guiding those responsible for Selective Service.

Our suggestions for a better system would be based on the designation of the University as a whole as essential, with tightened academic standards preventing any wastage of time and providing, to a certain extent, needed manpower. In peace and in war the University fills a very definite social need. Why then attempt in a period of national emergency to define which courses are more nearly applicable to war needs, when the decisions embody such unsound interpretations? A nation at war cannot afford waste of time and therefore poor students should be eliminated. But general Arts and Science students are not wasting their time if they keep up to a required standard. And the other faculties should be given to easier

your university. Mail applications direct to "The Secretary-Treasurer, National Research Council, Ottawa."
S. P. EAGLESON, Sec.-Treasurer.

#### **Outdoor Club Executive Suggests** House Dances Wrongly Organized the drive as successful this way as

Editor The Gateway.

Dear Sirs,—Below is a copy of the letter sent to the Students Council student all right, but only in one by the Executive of the Outdoor

I should appreciate it if The Gateway would print it to allow the members of the club and others that may be interested to see what action I, as president of their club, have

To the Council.

Dear Sirs,—In view of the fact that the Outdoor Club has pursued a policy of social activity as well as of sports, I believe that a few suggestions on the House Dance problem might be in order.

On Saturdáy, Feb. 12th, I stopped in at the House Dance after a few hours of studying to see if I could spot the trouble that must be the cause of the House Dance failures. I talked with those present and the persons in charge of the dance. I came to certain conclusions which I pass on to the Council now.

The organization of the House Dances is wrong. House dances are, I am told, for the facility of Varsity students and are supposed to be

Choirmaster: Jack Williams

mixers. As far as I can judge, the house dances endure the Varsity form—in couples. Those who are having a good time at the dances are those who have come as a small party. This, I suppose, is not a bad feature, but it is not the prime purpose of the House Dance.

How, then, can these be remedied? I recommend the following suggestions:

1. That the present form of House Dance tickets be abolished. I suggest burning. The programs are obviously meant to be filled out and used by a couple.

2. That an extensive advertising campaign be launched for each House Dance, and that the present posters be also burned or placed in

3. That by suitable means, committee or rotating clug sponsor-ship, feature be arranged for each House Dance which makes it a Varsity party.

4. That the Co-ed Club be congratulated for the way they have handled the refreshments, and be encouraged to continue and be helped if they so desire. 5. That stag attendance be made

a point of attraction. Here let me suggest that the ball be started rolling by setting the price of admittance at 25c a person and 60c a

6. Finally and primarily, that the House Dance be planned as a deficit and not a money-making institu-tion on the Council's books. At the present time the A Card would

cover this. Having found The Gateway very co-operative in the past, I feel sure I may rely upon you this time.

Sincerely yours, M. W. CLARK, Pres., Outdoor Club.

War Drive Contributions Indicated by Faculty Lists

Council meeting began promptly at 7:05 on Wednesday. Feb. 16. There were sixteen members present, and seven visitors. Mr. Amerongen was in the chair. The last item of business was very important, and caused a good deal of discussion. The item on the agenda read: "Protest re expulsion of lower fifty per cents." As a statement had come out in the overtown newspapers on Wednesday, everyone knew what was meant. Mr. Amerongen suggested that as long as there are a few of us

left to kick, we ought to kick. It was moved that we request President Newton to hold a mass meeting of

ness concerned the raising of funds for the I.S.S. (The International Student Service). Hart Cantelon and Roy Davidson of the I.S.S. stated that the reason for devising the method of having those who do not wish to contribute go up to the Bursar's office to indicate same, was that it would be easier for the Bursar's office to handle the hundred or so students in this way, rather than 1,200 students saying they would contribute. It was brought out in Council that in taking the easy way out, we were not upholding the principle of democracy. A method was suggested whereby the ones who wished to contribute would be ablited to take a positive step. be obliged to take a positive step.

Everyone agreed on the worth of the object of this fund. It was moved that lists of students by faculties be prepared and that students should indicate their wishes on the list have whatever amount was in their fund deducted, if they had indicated their willingness to contribute on the faculty lists. The motion was carried. The I.S.S. representatives were of the opinion that this method would reduce considerably the amount that might be raised, because of the inertia of students in making such a decision. It was thought that more campaigning might be done to make

Graduation is to be formal. Laverna Quinn, president of Wau-neita, reported the decision of the Wauneita Society in this matter. A motion to this effect was put on The Council recognizes that ecord. they are responsible for what ap-pears in The Orphan, as for any student publications. Color Night Chairman and Committee were chosen: Jack Jorgens as chairman, Ken Richardson, Roma Ballhorn and Hu Harries as committee. The date of Color Night is to be in the week of March 13th.

The names brought in for Executive A awards were as follows: Frank Murphy, Alan McDougal, Jack Jorgens, Bob Black, Bob Schrader, Gerry Amerongen, Gerry Larue. An amendment to the con-Larue. An amendment to the constitution was proposed, whereby an award would be given to students in their final year who have accumulated 75 points. The opinion of the Constitutional Enforcement Committee was to be asked regarding the giving of awards to students who earned such before Christmas, but did not return after Christmas. A letter from Malcolm Clark, presdient of Outdoor Club, was read, in which he made suggestions for reviving interest in House Dances. It was moved that Council sponsor the last House Dance of the year, arrangements to be under the chairman-ship of Sheila MacRae. Mr. Wilf Cotter and the D.U.S. was commended for their fine work in con-

ducting the magazine drive.

An Athletic Conference of Western Universities is proposed, to be held here or in Saskatchewan, was discussed. There has been no athletic conference since 1939-1940, the date of the last track meet between western universities. The Students' Union authorizes that we share in the expense of such a conference, sending three people to take part, in the W.C.I.A.U.

The meeting broke up at 9:20.

#### Thought of the Week

"I am not bound to win, but I am bound to be true. I am not bound to succeed, but I am bound to live up to what light

I must stand by anybody that stands right, stand by him while he is right and part with him when he goes wrong."—Lincoln.

# Newton to hold a mass meeting of the students to answer questions of students on the new regulations. The motion was carried unanimously. Another important item of business concerned the raising of funds for the VSC to the concerned the raising of funds.

Dekes, Phi Delts Sign 100%

The University Blood Donor campaign closed this week, and showed a total of 558 students willing to give blood to the Red Cross for use in the treatment of shock and haemorrhage in our wounded. This response shows that University students are willing to do their bit in whatever way may come to hand; that they appreciate the need for blood-serum for our forces overseas.

by the doughty Dents with a fine 83%, and the Army Engineer Course with a commendable 82%.

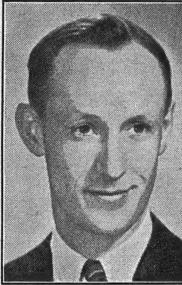

Meds have signed up to the score of 63%, Theology to the tune of 57%, little better in the last half-dozen groups, but part of the reason may have been inadequate canvassing. The committee hopes that if there are those who feel that they had insufficient opportunity to sign a form that they will take the first chance to drop down to the Blood Clinic in MacDougall Church and

S.C.M. SECRETARY

GERRY HUTCHINSON

General Secretary of the Students' Christian Movement of Canada, who is on the campus this week. Mr. Hutchinson, a graduate of University of Alberta and St. Stephen's College, is well known here. During the session 1942-43 he was general secretary of Alberta S.C.M'ers.

Spring Song

As the flaming head of the sun god began to rise from rest beyond Percentage participation figures the horizon, misty in the morning show the Aggies leading the way lite (I mean the horizon), the lucid with an excellent 88%, closely trailed notes of reveille floated gently among the dewy tents. Immediately the eager Varsity army bustled to exciting duty. That is all but one. To him came the sergeant.

"Well," he yelled, "Didn't you hear the bugle?"

"Natcherly."
"Well, what about it?" "Don't you think he was rather lat on that top note?"

Plans for drawing the blood have

had to be temporarily altered, since Red Cross officials have informed the committee that the Mobile Clinic has been delayed in transit somewhere between Toronto and Edmonton. If the Mobile Clinic arrives in time, it will be set up at the Infirmary to handle student donors, but phoned a week in advance to go downtown to the Clinic in Mac-Doungall Church on Monday or Tuesday mornings or Thursday evenings. Students are asked to go down the first time they are phoned in order that all donations may be made in good time before the finals.

This, then, closes the Blood Donor campaign at Alberta. The commit-tee, consisting of Roma Ballhorn, Laverna Quinn, Sylvia Rowan, Bar-bara Strong and Iain Younger, chairman, wishes to thank the students, and particularly the various presi-Among the fraternities on the campus, the Dekes and the Phi Delts led the way with perfect scores of 100%, closely followed by the D.U's with 95%. D.G's and Pi Phi's piled up excellent 90% scores for the girls. The blood given by the campus will give the Red Cross a substantial boost toward attaining their local objective.

Any further information will be

War Drives of Former Years Recalled

The Gateway, the Council, the and we know it—look at the tre-Faculty, that we have some of the mendous difficulties under which former major war drives at this Varsity? Fun, weren't they? The with activity for when U. of A. students got together, tags and badges were doled out by enthusiastic (high pressure) salesmen, sometimes in costume, in return for quarters and dollar bills; ribbons were sold instead of cor-sages at formals, and the proceeds went to the war drive fund; campus groups vied with one another for alesmanship honors—remember?

Well, times have changed. Studies

Dear Sir:

Finally, the drain-pipe of indifference being choked by the inanity

Dear Sir,—A recent order of the Dominion Government states that of humanity, our congealing emotions gurgle from the gutter, and gush into The Gateway—articulate at last. We shall proceed to disin-re-entrance to the universities, re-

inated lime of impartiality.

The first honorable individual to whom our attention will be directed, in industry, and halfway to being the author of "Are You Kidding, lawyers, business men and minis-Judy?" is gnawing at the bitter ters, which Heaven knows we need rind of satire with toothless gums.

trait of last week's authoress. A sort of reptilian sneer runs through the whole article. There was nothing from "Judy" to provoke this. Though the author adds as an afterthought (P.S.) that no offense was meant, offense was certainly given not only to the authoress, but to any decent reader. Why do you write articles like this?

Yehudi's poetry is beautiful and the rest of his column is good, for that type of writing. "Vox Studenti," however, shares with the Deacon's effusions this defect: being a gossip column it has only a limited appeal, to a limited number of people, of

barracks.

If half the students are bounced, then only one in six stands to get such material to Miss Diamond's column in which she gives short biographies of "fascinating people" not necessarily known to us. Instead of vague personal allusions incomprehensible to the uninitiated, Miss Diamond gives clear-cut pictures enjoyable to ambody.

Appropriate the only one in six stands to get through a three-year course, and only one in eight will graduate from a four-year course. Who is going to enter those faculties with all the cards stacked against them? They may as well go to technical school and get the credit for it. What are our Canadian universi-

## First in Two-Out-of-Three Playoff Commences at 1:30

BOB BUCKLEY PROMISES ENGINEERS TO BE IN **FINE SHAPE** 

Mackay Says Nothing Much Wrong With Med-Dents Either

It's to be Med-Dents against Engineers for the Interfaculty hockey league championship. This was decided last week-end when Coach Bruce Mackay's M-D gang closed out the schedule with a flourish by brushing off Arts-Ag-Com-Law, final score being 3-3 with but five minutes remaining. Then, faced with the absolute necessity of turning in a win, Colter's Combines had to last hopes of a playoff berth fade into nothingness. At the same time it represented the eighth straight win for the Macmen, enabling them to complete the regular schedule without age of breakaways, speared a pair loss of a game.

Obviously, Med-Dents have had things pretty much their own way all season long. Neither Engineers or A-A-C-L have been able to seriously threaten at any time. The big three of Bruce Mackay, Barss Dimock and Paul Drouin have guaranteed the league lenders more guaranteed the league leaders more than enough scoring punich, while the supporting cast, including such capable performers as netminder Ken Torrance, forwards Art Fraser, Harry Jones and others, has been adequate at all times.

The Engineers, managed by hustlin' Bob Buckley, promise to give the league-leaders plenty of trouble in the first of a two-out-of-three final, starting Sunday at 1:30. The new starting time for Sunday games should be noticed. The Engineers, led by Bill Dimock, Lauriente, and Dutka, have made it tough for the opposition, and are no part of a pushover, Med-Dents or no. Probable lineups will be:

Engineers — Setters, Spence Mc-Lean, Howard, Dunsmore, Dimock, Proctor, McGuffin, Ross, Dutka, Lerbekmo, Burton, Lauriente.

Med-Dents — Torrance, Mackay,
Miller, Barss Dimock, Jones, Fraser, Smith, Lappa, Walhovd, Drouin.

#### Con Fitzgerald Sparks Team to 84-65 Win Over Golden Bears

Colb McEwan Brings Up Smooth-Working Club

BEARS MAKE STRONGEST BID YET FOR TROPHY

Basketball's Golden Bears bit the dust 84-55 in the doubleneader series against U. of S. Huskies last week-end. And they even looked good in doing so; only for a few minutes in the first game did they look bad. Those few minutes ruined their whole day, so far as scoring went. Con Fitzgerald rang up 17 points in the afternoon game-just the difference between the teams. The final score was 49-32.

Huskies opened with a flourish, taking a seven-point lead early in the first quarter. Jack Switzer kept the Bears in the running by clicking for the occasional basket. Sammie Sheckter, floor captain, kept pace with his line-mate, and aided by Al Manifold's vigorous checking of Fitzgerald, the boys from Alberta walked into the dressing room at half-time licking their chops, and hoping their two-point lead would last. They had notched 19 points to the Huskies' 17, and things looked

 $\mathbf{T}$ he Huskies came out in the second half with a terrific attack, and the Golden Bear machine flew and the Golden Bear machine flew to bits. A momentary blow-up let the Huskies run away from them, and by the time they settled down the damage was beyond repair. Con Fitzgerald held the audience agog with his court acrobatics and his uncanny marksmanship. Fitz would be a star on any team, and the Albertane were hearty in their ap-Albertans were hearty in their ap-plause for his efforts. # Is Big Thrill For

**Packed Galleries** 

Last Saturday evening saw the second game of the Intervarsity basketball series between Saskatchewan Huskies and Alberta Golden Bears. Coach Colb McEwan's Huskies and Salvara kies came out on top in this game by the score of 35-33. This game being the second of the day for the two teams might give one the impression that as the boys were tired, the play would be considerably slower in the afternoon. However, nothing in the play of the evening showed any indication of fatigue. Play was indeed fast, and at times quite rug-ged. Alberta, after finishing on the short end of the score in the after-noon game, were determined to make a better showing in the evening tilt. This they did, exemplified by the close score of the contest. So it is that the Rigby Memorial Intercollegiate basketball trophy stays with Saskatchewan for another year.

Alberta perhaps looked her best of the whole series in the first half of the game. Before a capacity crowd of enthusiastic students, the Golden Bears led their opponents by a score of 11-8 at the end of the first quarter. At the half, the Bears had doubled their lead of the first quarter. ter, and the score stood at 19-13.

The play of the first half was

much cleaner than that of the second frame. Accurate marksmanship by Sheckter, Manifold and McInnis proved to be the highlights of this period. Al Manifold, playing one of his best games of the year, scored nine points in this game alone, to be the top scorer for his team for the evening performancee. Saskatche-wan being more closely checked in this period, seemed to be holding back reserve energy for their secon period drive.

The second frame saw the Huskies

go into action. Alberta, however, also started to put the old ball where t counts the most, and at the threequarter mark the score stood at 28-28. Coach Gordie Ferguson of the Golden Bears then issued orders to check the Huskies to a standstill. Coach McEwan must have done the same, for from the beginning of play in the final canto to the end of the game only seven baskets were scored. Due to an unfortunate collision with Fitzgerald near the sidelines. Phil Proctor was rushed off the

Jerry Fodey was elected to take the foul against Alberta, and he neatly tucked the ball in the he neatly tucked the ball in the basket, to put Saskatchewan ahead. Chuck Fewster finished the scoring for the Huskies, and the count stood at 35-32 with but seconds left in the game. However, Alberta never stopped trying, and Del Steed, hardworking Alberta forward, put in a free shot to end the scoring for the evening at 35-33

evening at 35–33.

On combined points, Fitzgerald easily led his own team-mates and the opposition, amassing altogether 31 for the series. The leading point-getter for Alberta was Switzer, who garnered 16.

To the inlooker, the evening gam was easily the most exciting of the two. Saskatchewan, as always, fielded a well balanced squad. Alberta, however, is not to be underrated, because they put up a really fine display, and at no time did they show any lack of spirit or of will-ingness to fight to the finish.
